

George Lindley

AI Solutions Consultant

Riyadh, Saudi Arabia | george.j.lindley@gmail.com | georgelindley.com | LinkedIn | GitHub | British citizen

Client-facing AI solutions consultant with 10 years' Middle East experience, completing an MSc in Business Analytics. Builds applied AI and analytics products, including daily AI matching of Saudi government tenders and a regulatory database published with United Nations University and UC Davis.

APPLIED AI AND ANALYTICS PROJECTS

Regulated Plants Database

regulatedplants.unu.edu

Data consultant and developer for a database published with **United Nations University** and **UC Davis**.

- Turned the research team's raw CSV files into a governed SQLite and GeoJSON dataset of **2,192** taxa across **104** jurisdictions, and designed and built the public web app.
- Advised on the schema and data-collection templates, and helped shape the research direction.
- Hosted on UNU's domain, featured in UNU's Sustainability Nexus AID Tools collection and presented at the Dresden Nexus Conference 2025.

Stack: Python, SQLite, GeoJSON, Flask, Leaflet

Saudi Tender Intelligence

Self-initiated, Pearson KSA

Built an AI bid desk for Pearson, which had none: daily matching of new education tenders in KSA.

- Scrapes Etimad tenders as they are published and matches them to Pearson's profile **daily**, with OpenAI embeddings, Qdrant and explained rankings, checked by relevance judgements.
- Briefed senior management on a year of new tenders: **direct delivery training** for major government projects was the main opportunity; custom **GenAI** courses a smaller, frequent one.
- Alerted colleagues across lines of business to relevant tenders they might otherwise have missed.

Stack: Python, web scraping, Flask, OpenAI embeddings, Qdrant, scheduled jobs

Dissertation: Saudi Procurement Bid Intelligence

MSc Business Analytics, Aston University

Procurement business intelligence: how far can public award data guide supplier bids?

- Back-scraped **six years** of awards across all sectors: **75,000** competitions (2020–2025), entity-resolved.
- The highest compliant bid is often **more than double** the lowest, and winners typically bid **14%** below the next acceptable offer: margin suppliers leave on the table.
- Pre-registered, falsifiable conjectures on rival counts, rejection risk and winning price, with refutation thresholds frozen before results were seen.

Stack: Python, SQL, entity resolution, statistical modelling

Causal Blocks

causalblocks.com

Open-source tool that teaches causal inference by letting people draw it.

- Users drag real data onto a canvas and draw cause-and-effect arrows; a DoWhy estimate updates with every arrow, and each variable is labelled by its causal role.
- **960** estimates precomputed, each with **3** refutation tests; identification logic ported to JavaScript and verified against DoWhy on **600** random graphs, so it runs with no server.

Stack: Python, DoWhy, JavaScript, static web hosting

PROFESSIONAL EXPERIENCE

Regional Commercial Lead

July 2021 – Present

Pearson Regional Headquarters, Riyadh

- Lead commercial and growth strategy across five Middle East markets; regional revenue grew **18%** a year from 2018 to 2024, driven by segmentation, demand forecasting and CRM analytics.
- To find revenue beyond the existing product range, set up Saudi tender intelligence where Pearson had no bid desk (see projects), briefing senior management and colleagues across lines of business.
- Act as solutions consultant in university technical decisions, such as LTI integration versus batch registration for digital learning platforms.
- Translate institutional and workforce needs into product positioning, pricing and go-to-market decisions with senior commercial, academic and product stakeholders.

Learning Consultant / Sales Manager

November 2017 – July 2021

Pearson Saudi Arabia and Middle East

- Led market validation for **Academic Progress** using regional institutional data and focus groups; it became Pearson's **#1** English course in Africa, the Middle East and Turkey, 2020–2022.
- Grew the anchor university account about **50%** a year from 2017 to 2022, with price per course up **70%** after the move to blended digital courseware.
- Ran sales operations, forecasting and territory planning; grew a regional product line to **USD 7M** in sales.

Language Teacher / EdTech Contributor

April 2016 – October 2017

King Saud University

- Taught academic English and built interactive content, assessments and digital exam-prep workflows.

CAPABILITIES

- **AI and LLM systems:** LLM workflow and prompt design, embeddings, vector search, RAG, structured outputs, guardrails, human-in-the-loop review, retrieval evaluation
- **Data and backend:** Python, SQL, Flask, FastAPI, SQLite, Qdrant, APIs, scheduled ingestion, data validation
- **Analytics:** causal inference, forecasting, optimisation, segmentation, CRM analytics, dashboards, evaluation design
- **Delivery:** discovery workshops, requirements, prototype-to-pilot, executive communication, change management and adoption

EDUCATION, TRAINING AND LANGUAGES

MSc Business Analytics, Aston University

2025 – 2026 (expected)

Dissertation: Saudi Procurement Bid Intelligence

MA International Relations, University of Warwick

2010 – 2011

BSc Modern Languages, Aston University

2006 – 2009

CS50x Introduction to Computer Science, Harvard University

Completed 2023

Languages: English (native), Spanish (C1), French (C1), Arabic (learning)
